PROFESSIONAL SUMMARY

Versatile Computer Science graduate with strong foundations in Python,Java, Web Development, and Machine Learning. Skilled in developing responsive frontend applications, scalable backend APIs, full-stack web applications, and implementing machine learning solutions. Proficient in Python, FastAPI, SQL, JavaScript, and modern web technologies. Passionate about building efficient, secure, and user-centric applications while continuously learning emerging technologies and software development best practices

WORK EXPERIENCE

Software Developer Intern | **Aishware Tech Solutions**| April 2026 – Present

- Developed a full-stack **E-Commerce web application** using **React.js** for the frontend and **FastAPI/Python** for backend development.
- Implemented **CRUD operations** and integrated the backend with a relational database using **SQL.**
- Implemented **user registration, login, JWT-based authentication, and authorization** for secure access to application features.
- Used **Git** and **GitHub** for version control and project management.

PROJECTS

To-Do Management System | FastAPI, SQLite, SQLAlchemy, JWT

- Designed and implemented **RESTful APIs** for task creation, retrieval, updating, and deletion (CRUD operations).
- Integrated **JWT** Authentication for secure user registration, login, and authorization.
- Utilized SQLite as the database and **SQLAlchemy** ORM for efficient database management and data modeling.
- Implemented input validation and error handling using **Pydantic** to ensure data integrity

Fake News Detection System | Python, Scikit-learn, Pandas

- Trained and evaluated a fake news detection model with **Logistic Regression**, reaching **95%** accuracy on validation set.
- Implemented **Logistic Regression** for text classification and achieved high prediction accuracy.
- Utilized **Pandas** and **NumPy** for data analysis and preprocessing.

E-Commerce Web Application | React.js | Spring Boot | MongoDB | REST APIs | JWT | Java

- Developed a full-stack e-commerce web application with a responsive **React.js** frontend and RESTful backend APIs.
- Implemented secure user authentication and role-based authorization using **JWT**.
- Designed and integrated **MongoDB** database models for users, products, carts, orders, and transactions.
- Tested REST APIs using **Postman** and managed source code using **Git** and **GitHub.**

TECHNICAL SKILLS

Languages: Java, Python, JavaScript ,TypeScript SQL, HTML5, **| Frontend** : CSS3 React.js, Bootstrap
Backend: Spring Boot, FastAPI , JWT Authentication, Pydantic | **Databases:** MongoDB, MySQL, PostgreSQL, SQLite
Tools: Git, GitHub, VS Code, Postman, Swagger UI, AWS ,Docker **| AI/ML**: NumPy, Pandas, Scikit-learn,
Core Concepts: OOP, DSA, DBMS, SDLC, API Development, CRUD Operations,Unit testing

EDUCATION

B.Tech in Computer Science and Engineering — Karunya Institute of Technology | CGPA: 6/10 2022-2026

CERTIFICATIONS

- **Microsoft AI-900**: Azure AI Fundamentals — December 2024
- **PCAP** — Programming Essentials in Python — March 2023
- **Infosys Springboard** — Java Programming Fundamentals — November 2023
